

Training on Retrofit Construction and Supervision was held by BSPP

Training on "Retrofit Construction and Supervision" was commenced under the project of BSPP in PWD training Academy & Testing Laboratory, from 15th to 17th October 2019. In this case, the training was prepared and organized by PWD following the training operation manual of BSPP. The number of participants is 38 persons. They are mainly the site officers of PWD who have the middle range experience.

The operation of the training performed by PWD-TA and started by the address by the director of PWD-TA. During the training, the active discussions were raised and interchanged between the lecturer and participants.

Especially, the trainings by Ms. Nur-E-Kawaine, Executive Engineer of HQ and, Mr. Muhammad Zillur Rahman, Sub-divisional Engineer of Mymensingh Zone were very impressive, because they talked and discussed based on their actual projects in PWD. It was sure that the critical points of the training were felt close to the participants, because the participants also are facing the similar problems in the actual sites always.

Mr. Zillur has suggested the following issues during his retrofitting projects in Mymensingh to BSPP, and some of the items that he suggested were included in the current BSPP activities. His suggestions were to prepare "Feasibility study system to consider the project", "Rough cost estimation guideline" is necessary to prepare.", "Schedule of Rate for retrofitting work" and "Preparation system for outsourced engineer to monitor reports of site". Now, BSPP continues to discuss among the team members to realize his suggestion that is raised by the retrofitting project experience.

In the training, the site training was also carried out. The participants visited the retrofitting museum, the building material test site and the actual retrofitting site of PWD-HQ, and experienced firefighting training. In the closing session, the participants appreciated that BSPP provided the fruitful training opportunity. BSPP wished that the training certification would be useful for the projects of participants.
